CONSOLIDATED FINANCIAL RESULTS (NEWS FLASH)

AIR WATER INC.

Head Office: 20-16, Higashi-shinsaibashi 1-chome,
Chuo-ku, Osaka, Japan

Results for the Six Months Ended September 30, 2009

Qualitative information on the Company's consolidated business performance

With increasing exports to Asia especially China, further inventory adjustment and government economic stimulus plan, the Japanese manufacturing industry has broadly increased production activities through the second quarter of the fiscal year. On the other hand, however, strong yen and perceived excessive capacity have resulted in lack of confidence in sustainable economic recovery as capital and housing investment have remained at a low level, leaving local businesses and middle- and small- manufacturing companies in difficult conditions.

Regarding the achievements of AWI Group under such circumstances, the Industrial Business has been on a track to recovery thanks to significant reduction of production while the Chemical Business has continuously suffered from reduced production of raw materials and sluggish demand. Meanwhile successful structural reform aimed at improving profitability of consumer businesses at the Medical Business and the Energy Business has led to significant gains compared to the same period of the previous year, contributing to the overall earnings during the period.

As a result, for the second quarter ended September 30, 2009, net sales revenue declined 9.3% year on year to ¥ 199,437 million, operating income declined 2.9% year on year to ¥10,867 million and ordinary income declined 16.1% year on year to ¥ 10,635 million. Net income for the second quarter ended September 30, 2009 was ¥ 4,846 million, a decline of 27.5% year on year.
