4. Summary of operating results

- (1) Explanation of Operating Results
- 1) Operating results for the current period

During the consolidated fiscal year, there was a trend toward a recovery in personal consumption in the Japanese economy due to the normalization of social and economic activity, which has been impacted by the COVID-19 pandemic. However, the Japanese economy was seriously impacted by soaring energy prices, the disruption of global supply chains and rising prices caused by the weakening of the yen. In the second half of the year, the situation continued to be unstable and affected by concerns regarding a global economic slowdown due to inflation in other countries, a rapid decline in demand for semiconductors and other factors.

In these circumstances, the Company and its affiliates (the "Group") established the "terrAWell 30" long-term vision towards 2030 to enable the Company to contribute to solutions to social issues through its business activities in line with its two foundations for growth, the "global environment" and "wellness (healthy life)", with an aim to achieve sustainable growth and an increase in corporate value. The Company has also established the "terrAWell 30 1st Stage medium-term management plan" for the three years from FY2022 to FY2024. In addition, as a step toward achieving its goals, the Group aims to maximize the synergy created leveraging the Group's strengths, specifically its diverse businesses, human resources and technologies, so the Group introduced a new unit system to shift to a group management system which has integrated the Company's head office organization and the Group companies.

Under the new management strategy and organizational structure, the Group aspires to achieve revenue of \(\frac{\pmathbf{\frac{1}}}{1}\) trillion, a goal of the entire Group since 2010, while establishing a foundation for overseas and electronics-related businesses which we position as a growth area, enhancing the revenue structure of domestic businesses through the creation of Group synergy and the optimal allocation of management resources, and promoting the creation of new businesses for the next stage of growth leveraging ideas that transcend the conventional boundaries between businesses and proactive technology development.

In overseas business, the Group promoted the establishment of production and logistics infrastructure in India where a series of integrated blast furnace steel mills have been constructed in succession, while it entered the industrial gas sales business through M&A activities in North America. The electronics-related businesses took on the task of reinforcing their relationships with customers leveraging their ability to develop materials that can meet advanced needs and the Group's comprehensive strengths under the new business operation system that combines the industrial gas and chemical businesses, in addition to capital investments in gas supply plants in response to the strengthening of the production capabilities of domestic semiconductor device manufacturers.

In existing domestic businesses, we worked to ensure profitability by reducing costs through the streamlining of production and logistics and the review of procurement to address soaring energy prices and the rising cost of raw materials and distribution, and by correcting sales prices to shift the increased costs that cannot be covered by our own efforts. We also proceeded with the transformation to a business structure that can flexibly respond to changes in the environment by integrating and reorganizing the Group companies in each business segment and starting capital and business alliances with other companies in the agricultural segment.

Regarding new businesses that contribute to solving social issues, in the global environment segment, we focused on the realization of decarbonization solutions in society by developing compact CO₂ recovery equipment and constructing a energy supply model featuring local production for local consumption including the production of liquified biomethane derived from livestock manure. In the wellness segment, the construction of the Air Water in KENTO open innovation promotion facility progressed steadily with the goals of strengthening cooperation with universities and local governments and creating new businesses by combining the Group's technologies and business models.

Regarding its sustainability initiatives, the Group has reviewed its targets for the reduction of CO₂ emissions and promoted the reduction of energy consumption and the improvement of production processes in accordance with the newly set goal of reducing GHG emissions 30% by FY2030 (compared with FY2020). Also, the Group bolstered its diversity and inclusion efforts including the improvement of the environment enabling the Group's personnel in charge of diverse businesses can work energetically and actively, and strengthened its human capital who play central roles in value creation by reforming its personnel system to encourage autonomous career development.

Performance during the consolidated fiscal year grew robustly through the steady capturing of demand through the reinforcement of supply infrastructure through proactive capital investments in electronics-related businesses and

industrial gas supply businesses in India. After increasing the Group's synergy in its adaptation to change in the business environment following the pandemic, the Health & Safety segment exhibited strong performance on the whole, driving the results of the Company as a whole.

Consequently, all operating segments achieved revenue growth due to the revision of prices and rising sales prices linked to market trends and also due to our pursuit of Group synergy leveraging the Group's unit system.

In terms of profits, the feed-in tariff ("FIT") system for renewable energy which is used in the electric power business prevented the Company from transferring an increase in the cost of power generation fuels and marine transportation to the selling price. This significantly affected its business result throughout the fiscal year.

As a result, for the consolidated fiscal year, the Group's revenue was \$1,004,914 million (113.1% that of the previous year), operating profit was \$62,181 million (95.4%), and profit attributable to owners of parent was \$40,137 million (92.9%).

2) Consolidated results by segment for this period

,	P		(U	Jnit: Million yen)	
	Re	venue	Operating profit		
	FY 2022	YoY Growth	FY 2022	YoY Growth	
Digital & Industry	342,549	118.6%	29,002	104.3%	
Energy Solutions	91,919	108.8%	5,703	81.4%	
Health & Safety	235,992	108.5%	15,482	116.6%	
Agriculture & Foods	152,069	109.0%	5,521	96.6%	
Other Businesses	182,382	115.1%	1,062	9.9%	
(Adjustment)	_	- %	5,409	- %	
Total	1,004,914	113.1%	62,181	95.4%	

(Note) The adjustment to operating profit is due to costs incurred at the Company's headquarters division which was not allocated to any reporting segment.

<Digital & Industry >

Revenue in this segment was ¥342,549 million (118.6% that of the corresponding period of the previous year), and operating profit was ¥29,002 million (104.3%).

For the **business as a whole**, in a severe environment where the Group was significantly affected by soaring energy prices and the rising prices of goods, we endeavored to improve productivity and thoroughly revised prices. The industrial gas supply business in India remained buoyant, and the electronics business also performed steadily, although there were some signs of a slowdown in the latter half of the fiscal year. As a result, both revenue and profit increased from the previous fiscal year.

In the **electronics business**, the performance of on-site gas supply for large semiconductor manufacturers was steady. Sales of special chemical materials and equipment for supplying special chemical materials and sales of heat control equipment for gas refining machinery and for semiconductor manufacturing equipment were steady despite the influence of customers' inventory adjustments and the postponement of capital investments in the latter half of the fiscal year. In the information electronic materials sector, sales of semiconductor materials and electronic components were strong in Japan and abroad.

In the **functional materials business**, the rising prices of basic chemicals connected to the conditions of the petrochemical market resulted in an increase in revenue. The results of the functional materials business as a whole remained steady due to the recovery of sales of sodium acetate which is used to extend the life of food products and increased sales of O-rings (sealing materials) for semiconductor manufacturing facilities and high-function circuit products for industrial robots which offset a decrease in demand for precision polishing pads, electronic materials, etc.

In the **industrial gas business**, the volume of gas sold dropped slightly year on year due to the weak production of steel and automobiles. However, revenue increased due to the revision of the prices of various gas products in addition to rising per-customer sales of on-site gas supply services for steel manufacturers caused by a continuous increase in electricity charges and distribution costs. The impact on profit partially remained until the price revision was applied.

The overseas and engineering business remained strong throughout the current consolidated fiscal year, given that

our on-site gas supply services to steel manufacturers maintained a high operating rate in tandem with the buoyant crude steel production in India and that we worked to streamline plant operations. Regarding tanker truck and cylinder gas supply services, climbing demand for services for automobiles led to a growth in sales volume.

<Energy solutions>

Revenue in this segment was \$91,919 million (108.8% of that of the corresponding period of the previous year), and operating profit was \$5,703 million (81.4%).

The **business as a whole** the energy and environment sectors were integrated to construct a new business model to supply energy in a way that contributes to carbon neutrality by using unutilized local resources. The business suffered a huge dip in profit resulting mainly from a slowdown in sales of dry ice affected by a shortage of raw materials in the carbonic acid gas supply despite revenue growth following the rise of the unit selling price of LP gas in connection with import prices.

The **energy business** saw sales grow due to a surge in unit selling price for LP gas linked to import prices. Prices were revised to address rising distribution and other expenses, but profit was influenced by inventory valuation as import prices fluctuated in the latter half of the fiscal year when inventory volume increased.

In the **resources recycling business**, sales plunged considerably from the previous fiscal year. This was due to a decrease in dry ice sales chiefly due to a shortage of the raw material gas in the carbonic acid gas supply. In contrast, hydrogen gas achieved brisk sales mainly in on-site supply to the nonferrous metals industry. In addition, the Group developed the small CO₂ collection device, ReCO₂ STATION, and liquefied biomethane usable as an alternative fuel for LNG and built a business model for the collection and use and new energy.

< Health & Safety>

Revenue of this segment was \(\frac{\text{235,992}}{\text{ million}}\) million (108.5% of that of the corresponding period of the previous year), and operating profit was \(\frac{\text{15,482}}{\text{ million}}\) (116.6%).

Regarding the **business as a whole**, recognizing the changing environment surrounding medical institutions and consumers due to the COVID-19 pandemic, the Group promoted the business structure establishment with an eye on infectious disease control that will be needed in the future and new methods of providing healthcare. As a result, the business steadily captured the demand generated by medical fields including the stable supply of medical oxygen, the renovation of hospital facilities, the streamlining of hospital management through supply, processing and distribution (SPD) management, etc. The consumer health sector, which includes home medical care, dental services, hygiene materials and other operations that are closer to consumers, recorded strong performance with revenue and profit both exceeding the level in the previous year and drove the entire results of the Company.

In the **medical products business**, contracts for leasing oxygen concentrators to local governments continued and sales volume of medical oxygen increased mainly due to a recovery in the number of surgeries at hospitals. In the dental sector, strong results were posted as CAD/CAM crown materials as the inlay for the treatment of cavities began to be covered by insurance.

In the **safety services business**, renovation projects increased in the hospital facility construction sector, while a large-scale construction project was completed, resulting in robust performance. Hospital facility construction projects in Singapore were accelerated after restrictions on activities were eased. The fire extinguishing system sector performed firmly with demand steadily captured for products used at power generation facilities and data centers.

In the **medical service business**, which mainly involves contracted sterilization and SPD management, progress in the acquisition of new customers contributed to an increase in revenue mainly due to proactive proposals for streamlining of hospital operations where labor shortage has been continued.

For the **consumer health business**, in the hygiene material sector, sales of surgical products and infection control products for consumers such as self-developed masks increased. The aerosol sector performed steadily because contracted production of cosmetics and ultraviolet (UV) protection sprays increased toward the latter half of the fiscal year, which offset the negative impact of rising raw materials costs. The performance of the injection needle sector was strong after the rallying of dental needles and cosmetic needles in overseas markets in addition to sales related to vaccination needles.

<Agriculture & Foods>

Revenue of this segment was \$152,069 million (109.0% of that of the corresponding period of the previous year), and operating profit was \$5,521 million (96.6%).

In the **business as a whole**, performed robustly in the first half of the fiscal year as sales channels for delicatessen products expanded, demand for commercial food products recovered and progress was made in the revision of prices to address the rising cost of raw materials and energy. However, it was influenced by the cost of raw materials such as eggs and fertilizers which continued to rise in the second half of the fiscal year. The new consolidation of companies following M&A activities in the previous fiscal year had a positive effect, but there was a slight reactionary decline in operating profit slightly from the previous year due to the absence of the gain on sale of land posted in the previous fiscal year.

In the **foods business**, demand for commercial products generated by hotels and restaurants recovered in the delicatessen sector. The development of new sales channels and the release of new products led to brisk sales of products for consumers. On the other hand, conditions in the sweets sector were severe due to the rising cost of eggs and other raw materials and reduced consumer confidence caused by the increase of prices in the latter half of the fiscal year.

In the **natural food business** that conducts the contract manufacturing of vegetable- and fruit-based drinks, sales of mineral water to major customers increased, but profit levelled off from the previous year due to increased energy costs incurred by the factory.

For the **agriculture business**, in fruit and vegetable wholesale and processing sector, the wholesale and retail sales for fruit and vegetable showed weaker performance toward the latter half of the fiscal year due to the poor growth of some agricultural products in Hokkaido. Sales in the fruit and vegetable retail sector, which operates stores in department stores and other facilities, were sluggish due to weaker consumer confidence resulting from increased prices. However, thanks to the effects of the new consolidation of Plus K.K. which directly sells agricultural products in the Kansai area, the performance of the business as a whole was steady.

<Other business>

Revenue of this segment was ¥182,382 million (115.1%), and operating profit was ¥1,062 million (9.9%).

In the **logistics business**, the volume of cargo transported on trunk lines, mainly those between Hokkaido and Eastern Japan, increased after the expansion of the Group's logistics networks. The third party logistics (3PL) business, centering on food distribution, began the full operation of Low-Temperature Logistics Center II in Sapporo, while the volume of cargo related to online shopping that was handled at the Atsugi logistics center increased. Our efforts to optimize contract fees also contributed to robust results. The vehicle custom installation business, which designs truck bodies and installs accessories, was affected by the delayed deliveries of truck bodies. The negative effect of this was compensated for by a rise in the volume of industrial and medical waste collected and transported. Consequently, the performance of the business as a whole was brisk.

Revenue of **Nihonkaisui Co., Ltd**. grew as a result of the two price revisions centered on commercial salt in response to the soaring prices of coal and LNG which are used as fuels for boilers in the salt manufacturing process. However, its results declined from the previous fiscal year due to the increase of marine transportation fees for palm kernel shells (PKS) used as fuel for power generation in the power generation sector, which uses the FIT system.

The **industrial gas business in North America** received steady orders for carbon dioxide-related equipment and liquefied hydrogen tanks reflecting rising demand for solutions related to carbon reduction in the low-temperature equipment and engineering sector. In addition, sales of low-temperature containers for storage increased. In terms of profit, the situation was tough due to the delayed procurement of some components and the resulting stagnation of production. The Company made Dohmeyer Holding BVBA, which provides ultra-low temperature freezing systems, and Noble Gas Solutions, LLC., which is an industrial gas distributor based in New York, USA, through M&A activities. The **power supply system (UPS) business** performed well due to the improved progress of construction which is a result of the relaxation of activity restrictions in Southeast Asia. On the other hand, in Europe and the United States, conditions were more severe due to customers postponing their investment plans and surging materials prices.

The electric power business was severely impacted by the continued increase of the prices of woody biomass and coal which are the fuels used in power generation, the continued increase of marine transportation costs and the cost of

demurrage that has been incurred due to the congestion of port unloading facilities and equipment failure. There were great difficulties in the business throughout the fiscal year as the selling price of the power generated is fixed under the FIT system, making it not possible to shift the increased costs to the selling price. The Company transferred the shares of Air Water & Energia Power Yamaguchi that it owned to Chugoku Electric Power Co., Inc. on January 18, 2023. Consequently, Air Water & Energia Power Yamaguchi has become a wholly owned subsidiary of Chugoku Electric Power Co., Inc. and it is no longer a consolidated subsidiary of the Company.

(2) Summary of financial position for the current period

Total assets at the end of the consolidated fiscal year stood at \(\frac{\pmath{41,091,645}}{1,091,645}\) million, an increase of \(\frac{\pmath{46,613}}{69,613}\) million from the end of the previous consolidated fiscal year due primarily to increases in trade and other receivables. Liabilities stood at \(\frac{\pmath{4645,162}}{645,162}\) million, an increase of \(\frac{\pmath{42,988}}{420,988}\) million from the end of the previous consolidated fiscal year due mainly to increases in bonds and borrowings. Equity stood at \(\frac{\pmath{446,482}}{482}\) million, an increase of \(\frac{\pmath{226,625}}{260,625}\) million from the end of the previous consolidated fiscal year, due mainly to an accumulation of profit attributable to owners of the parent.

Equity attributable to owners of parent per share grew from \$1,744.42 at the end of the previous consolidated fiscal year to \$1,892.36, and ratio of equity attributable to owners of parent to total assets changed to 39.4% from 38.7% at the end of the previous consolidated fiscal year.

(3) Summary of cash flows for the current period

Cash flows from operating activities was an inflow of ¥56,953 million after deducting payments including corporate income taxes from profit before tax and depreciation, which was a decrease of ¥14,619 million from the previous consolidated fiscal year.

Cash flows from investing activities was an outflow of ¥71,135 million, which was an increase in expenditures of ¥17,980 million from the previous consolidated fiscal year, due mainly to an increase in expenditures resulting from purchase of property, plant and equipment and a decrease in proceeds resulting from sale of investment securities, despite a decrease in expenditures resulting from purchase of investment securities.

Cash flows from financing activities was an inflow of ¥19,257 million, which was an increase ¥25,880 million from the previous consolidated fiscal year, due mainly to an increase in proceeds from borrowings.

As a result, cash and cash equivalents at the end of the consolidated fiscal year stood at ¥65,944 million, an increase of ¥6,390 million from the end of the previous consolidated fiscal year.

(4) Outlook for the next fiscal year

The future outlook is increasingly the risk of global economic slowdown increasing due to various countries increasing interest rates to control inflation. Furthermore, the outlook for the semiconductor demand, which is a leading indicator in the manufacturing industry, is becoming even more uncertain, as inventory adjustment is expected to continue until the middle of FY2023.

Against this backdrop, the Group will accelerate its efforts to realize "terrAWell 30," the vision it aims to achieve in FY2030, in response to society's heightened expectations for the Group as it has risen to the corporate stage of "1 trillion yen of revenue.

Under a group management system based on a unit system, we seek the creation of Group synergy through the optimization of the Group's strengths, specifically its diverse businesses, human resources and technologies and its business bases which are deeply rooted in local communities in line with the two growth axes of "global environment" and "wellness (healthy life)," while at the same time, we will strive to practice "ambidextrous management" by "digging deep" to refine the profitability of existing businesses and "exploring" to discover and nurture business opportunities that will lead to the next stage of growth.

In increasing development, we will continue to promote the reform of the business structure, including the integration and reorganization of group companies in each business sector, in parallel with the enhancement of profitability through the review of assets, the utilization of the digital transformation (DX) and the allocation of personnel in optimal positions. In addition, we also address the improvement of profitability by continuing to revise prices in response to increased prices and the fluctuation of foreign exchange rates and by maintaining proper prices that appropriate in light of costs.

In leveraging development, the Group will aggressively promote M&A activities for the full-scale expansion of the industrial gas business overseas, while establishing a foundation for its business centered around the engineering technology that constitutes the core of the business. At the same time, the Group will create new businesses that contribute to solving the social issues faced by local communities by combining the innovations derived from its technological development in businesses deeply rooted in local communities and in diverse business sectors.

In order to realize our medium-term management plan, it is important to expand our overseas business. We will accelerate the expansion of our industrial gas and related equipment and engineering businesses, particularly in India and North America, as priority regions, leveraging the superior equipment and engineering technologies possessed by our group. In addition, we will focus on acquiring large customers by winning orders for on-site gas supply projects, as well as building our own plants, filling stations, and other bases. Furthermore, we will "strengthen our organization and structure" as the foundation to support these business expansions. We will develop a new organizational structure and risk management system to manage and operate our business according to the characteristics and environment of each region, not only by business field but also by region.

With regard to investments such as capital expenditures and M&A, we will be more aggressive than before, especially in overseas markets such as India and North America, to achieve business expansion and improve profitability. We will also strategically invest in intangible capital such as human capital, intellectual property, and brand power in order to

flexibly respond to changes in the environment and achieve sustainable growth in the future. At the same time, in order to appropriately allocate limited management resources, we will implement "selection and concentration" in each business area by assessing profitability and growth potential, as well as monitoring and verifying investment projects.

The Group is making company-wide efforts to realize a "decarbonized society", a "resource-recycling society" and a "A society in which humanity and nature coexist" aiming to achieve a "30% reduction in GHG emissions" by FY2030 and to achieve carbon neutrality by 2050. We will also focus on resource recycling and water resource conservation to achieve the goals of "80% waste recycling rate" and "10% reduction of water consumption per unit production".

The Group will continue to focus on solving social issues through its business activities and create products and services that are indispensable to people's lives and industry. In particular, in the "Agriculture & Foods segment, we will contribute to solving social issues against the backdrop of the recent international situation, such as food security and improving food self-sufficiency, and in the "Health & Safety" segment, we will contribute to solving social issues related to people's lives, such as the aging of the population. We have also decided to participate in the Osaka-Kansai Expo to be held in 2025, and will communicate the Group's corporate mission, "Meeting society's needs with nature's blessings," both domestically and internationally.

For the next fiscal year, we forecast net sales of \$1,080,000 million, operating income of \$72,000 million, income before income taxes of \$70,000 million, and net income attributable to owners of the parent of \$44,000 million.

(5) Basic Principles of Profit Distribution and Dividends for the Fiscal Year and for the Next Fiscal Year

The Company has positioned returning profits to shareholders as one of the most important management issues, while it works to enhance its management foundation to continuously increase corporate value. The Company's basic policy is to ensure the stable distribution of dividends from surplus in line with its business results in the future periods that targets a dividend payout ratio of 30% of profit attributable to owners of parent, taking into consideration the enhancement of internal reserves that are needed for strategic investment, etc. for medium- to long-term growth.

The Company has determined the year-end dividend for the fiscal year will be \(\frac{4}{2}\)8 per share based on the targeted dividend payout ratio in this basic policy. In addition, the Company decided to pay a commemorative dividend of \(\frac{4}{4}\)4 to celebrate the achievement of revenue of \(\frac{4}{1}\)1 trillion which is the result of the concerted efforts of all of the group companies since 2010.

As a result, the Company plans to pay an interim dividend of ¥28, a year-end dividend of ¥28, a commemorative dividend of ¥4, for an annual dividend of ¥60 per share.

With regard to dividends for the next fiscal year, the Company expects to pay interim and year-end dividends of ¥30 per share, which will bring the annual dividend to ¥60 per share.

2.Basic Rationale for Selection of Accounting Standards

The Air Water group has adopted the International Financial Reporting Standards (IFRS) from the year ended March 31, 2020 in order to enhance the international comparability of its financial information in the capital markets and to improve the efficiency and quality of group management.

3. Consolidated Financial Statements and Significant Notes

(1) Consolidated Statement of Financial Position (As of March 31, 2022 and March 31, 2023)

	FY2021 (March 31, 2022)	FY2022 (March 31, 2023)
Assets		
Current assets		
Cash and cash equivalents	59,554	65,944
Trade and other receivables	203,049	229,276
Inventories	76,404	92,014

(5) Notes to Consolidated Financial Statements

(Notes on assumption of going business)

Not applicable.

(Reporting company)

Air Water Inc. (the "Company") is a joint-stock company located in Japan. The registered address of the head office of the Company is in Chuo-ku, Osaka-shi.

The consolidated financial statement of the Company and its subsidiaries (the "Group") closes on December 31 and consists of equity interests of the Group and its affiliates and joint control agreement.

The Group operates manufacturing and sale in the segments, Digital & Industry, Energy Solutions, Health & Safety, Agriculture & Foods, and Other products and services. See the section, "segment information, etc." for the details of each business.

(Basis of preparation)

(1) Compliance with the IFRS

The consolidated financial statement of the Group satisfies the requirements of a Specified Company engaging in international financing activities in Article 1-2 of the Ordinance on Consolidated Financial Statements and have been prepared in accordance with IFRS as prescribed in Article 93 of the Ordinance.

(2) Basis of Measurement

The consolidated financial statement of the Group is prepared based on acquisition costs except retirement benefit liability (Assets) and financial instruments, etc. measured at fair value.

(3) Functional Currency and Presentation Currency

The monetary amounts in the consolidated financial statement are presented in units of yen, the functional currency of the Company. All financial data presented in Japanese yen are rounded down to the nearest million yen.

(4) Important Accounting Estimates and Decisions involving Estimates

In the preparation of the Group's consolidated financial statement, the business manager must make decisions, estimates, and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, revenues, and expenses. The actual results may vary from such estimates.

Estimates and assumptions that become the basis of estimates are reviewed continuously. The impact of a revision of accounting estimates is recognized during the accounting period in which the estimates are revised and future accounting periods that will be affected.

The important accounting estimates and decisions involving estimates in this consolidated financial statement are the same as the consolidated financial statement for the accounting year ending March 31, 2022.

(Significant accounting policies)

The accounting principles that the Group applies to the consolidated financial statement are the same as the accounting principles applied to the consolidated financial statement for the consolidated fiscal year ending March 31, 2022.

(Segment Information)

(1) Overview of Reportable Segments

The Group's reportable segments are components of an entity for which separate financial information is available and is evaluated regularly by the Board of Directors in determining the allocation of management resources and in assessing performance.

The Group plans comprehensive strategies for each product and service and operates its business activities. Therefore, the Group consists of operating segments for each product and service, and has five reportable segments, including "Digital & Industry," "Energy Solutions," "Health & Safety," "Agriculture & Foods," and "Other

Businesses."

The Digital & Industry segment primarily manufactures and sells oxygen, nitrogen, argon, and other industrial gasses, produces equipment related to high-pressure gases, and manufactures and sells functional materials, electronic materials, etc.

The Energy Solutions segment chiefly sells LP gas and kerosene, manufactures and sells carbonic acid gas and hydrogen gas.

The Health & Safety segment generally manufactures and sells oxygen and other medical gases, manufactures and sells hygiene materials, operates hospital facility construction, provides home medical care, and operates an OEM contract business of aerosol products.

The Agriculture & Foods segment primarily distributes and processes vegetables and fruits, manufactures and sells frozen food and processed meat products, and operates contract manufacturing of soft drinks.

The Other Business segment consists of Nihonkaisui Co., Ltd. manufacturing and selling commercial-use salt, a distribution business providing distribution services for general cargos, food products, medical supplies, environmental products, etc., a North American instrument gas business providing instrument gas-related equipment and engineering services mostly in North America, a business supplying high-output uninterruptible power sources (UPS), electric power business using woody biomass, etc.

(2) Matters regarding Changes in Reporting Segments

The Air Water Group has established two key concepts, protection of the global environment and people's wellness (healthy life), in view of global social issues we are going to confront such as the impact of climate change and the progress of the super aging society. In April 2022, the Group conducted an organizational reform restructuring the Group's diverse business sectors into four business groups in line with the above two key concepts.

As a result, from the first quarter of the current consolidated fiscal year, the conventional eight segments, Industrial Gas Business, Chemical Business, Medical Business, Energy Business, Agriculture and Food Products Business, Logistics Business, Seawater Business and Other Businesses, were reorganized into five segments: Digital & Industry, Energy Solutions, Health & Safety, Agriculture & Foods and Other Businesses. For the electric power business using woody biomass, the management system has been changed to optimize business operations in view of the drastic changes in the business environment. Accordingly, the electric power business using woody biomass is included in the Other Business segment from the third quarter of the current consolidated fiscal year onwards. It was previously categorized as part of Energy Solutions. The segment information for the cumulative third quarter of the previous consolidated fiscal year shown here was prepared based on the revised reporting segments.

(3) Information about the Amounts of Revenue and Profit or Loss by Reportable Segment

The accounting method of the reported operating segments is the same as the accounting method used to prepare the consolidated financial statements.

The profit figures of the reportable segments are operating profit. Intersegment revenue and transfers of funds are presented based on prevailing market prices.

FY 2021 (April 1, 2021 to March 31, 2022)

	Reportable Segment						A 12	
	Digital & Industry	Energy Solutions	Health & Safety	Agriculture & Foods	Other Business	Total	Adjustments (Note)	Consolidated
